

Workshop on

ELECTROCHEMICAL ENGINEERING

May 23-27, 2005

To be presented by the
Yeager Center for
Electrochemical Sciences
Case Western Reserve University
Cleveland, Ohio

Principal Instructor
Uziel Landau

The workshop is intended for
scientists and engineers from all
disciplines who want to gain
fundamental understanding and
working knowledge of the design
and analysis of electrochemical
systems

The workshop topics include:
Transport, Thermo, Overpotentials
Current and Potential distributions
Design, Analysis and Scale-up

Detailed case studies and analysis of:
Plating systems, batteries, fuel-cells,
industrial electrolysis, corrosion.
